

INNSBRUCK, AUSTRIA · EST. 2024

Software, hardware, and ideas for people who still care how records sound.

INDEPENDENT · SELF-HOSTED IN EUROPE

AUSTRIAN TRADEMARK AM 21750/2025 · CLASSES 9, 38, 41

THE STORY

Delicate Audio is the work of **Armin Lanzinger** in Innsbruck, Austria. What began as personal frustration with the tools for vinyl collectors and record shops became a small ecosystem: a music streaming platform, cataloging software, a community catalog, audio tools, and a hardware accessory.

Founded in 2024. Self-hosted in Europe. Independent. The brand **Delicate Audio** is registered in Austria as trademark **AM 21750/2025**, covering software (Class 9), telecommunications and streaming (Class 38), and entertainment services (Class 41).

The Ecosystem

STREAMING

CLASS 38 · 41

Music streaming and DJ platform: dual-deck mixing, smart radio, mood playlists, harmonic key matching, waveform visualization. Stream from your own library with a real listening interface.

app.delicateaudio.com →

INTAKE

CLASS 9

Cataloging, point-of-sale, and multichannel selling for vinyl shops and collectors. Photo scanning, barcode lookup, shelf mapping, eBay/Booklooker/Bertus/AbeBooks integration. Used in real record shops.

intake.delicateaudio.com →

EXPEDIT

CLASS 9 · 41

Community catalog of vinyl releases, contributed by INTAKE users. Faster matches, better data, attribution opt-in by default to anonymous.

expedit.delicateaudio.com →

STEMINA

CLASS 9

Studio-quality audio stem separation. Upload a track, receive isolated vocals, drums, bass, and instrumental in minutes. Powered by Demucs v4.

stems.delicateaudio.com →

MOSAIX

CLASS 9 · 41

Album cover mosaic generator. Print-ready A3 posters and ambient screensaver mode driven by your Discogs collection.

mosaix.delicateaudio.com →

SERPENT CLAMP

HARDWARE

Precision-machined turntable record clamp. Better contact between platter and record, reduced vibration, calmer playback. Designed and made in Austria.

delicateaudio.com →

IN DEPTH

INTAKE

A complete vinyl cataloging and record shop platform. Used by personal collectors and brick-and-mortar shops alike.

AI PHOTO SCANNING

Photograph your shelves. Vision AI reads the spines and matches each title against Discogs.

BARCODE SCANNER

Scan EAN/UPC with the camera or type them in. Lookup runs against Discogs and MusicBrainz with geographic priority.

DISCOGS DEEP SEARCH

Search by artist, album, label, or catalog number. Connect your own Discogs account and pull your collection in.

SHELF MAPPING

Map your physical storage with a flexible grid. Know exactly which shelf, which row, which slot.

MULTICHANNEL SELLING

List once, sell on eBay, Booklooker, AbeBooks, Bertus, and through your own shop. One inventory across every channel.

SHOP POS

Built-in point-of-sale with cart, customers, orders, and fiscally-compliant receipts for Austria.

WORKSPACES & TEAMS

Owner, managers, employees — separate accounts, scoped permissions, audit trail. Built for shops, not just solo collectors.

EXPEDIT COMMUNITY

A shared, opt-in catalog built by users scanning their collections. Faster matches, better data, anonymized by default.

AUDIO PREVIEWS

Upload short MP3 samples for each release so buyers can hear before they buy — directly in your shop.

PRICES & GRADING

Track Discogs lowest-listing prices, set your own with markup, grade condition, and watch inventory value in real time.

EXPORT & TAGGING

Generate tag scripts and folder layouts for your digital rips. Discogs metadata propagated to your local files.

SELF-HOSTED, EU DATA

All data stays on European servers. No ad networks, no third-party tracking, no algorithmic feed.

Self-hosted, EU data

Your collection and your shop's data don't belong on someone else's ad network. Everything runs on our own servers in Europe — no third-party tracking, no resale, no surprise migrations.

Built from inside

The features exist because the people using them needed them — not because a product team decided what's next. The tools follow how the work actually happens, not the other way around.

Independent, indefinitely

No VC. No exit pressure. No algorithmic feed to optimize. The plan is to keep building useful things for as long as the work is worth doing.

TRADEMARK & INTELLECTUAL PROPERTY

Delicate Audio is a registered trademark in Austria, filed October 2025, registration **AM 21750/2025**, status **Eingetragen** (Registered). The mark is held by Armin Lanzinger, Innsbruck, Austria.

Trademark owner: Armin Lanzinger, Innsbruck, Austria

Registration: AM 21750/2025 (Austrian Patent Office)

Status: Eingetragen (Registered)

Filing date: October 2025

Classes: Nice 9, 38, 41

The trademark covers the following classes of goods and services, all currently in active commercial use under the brand name Delicate Audio:

Class 9 Computer software, downloadable applications, digital media. Includes INTAKE (cataloging, point-of-sale, multichannel selling), EXPEDIT (community catalog), Stemina (audio stem separation), and Mosaix (album cover visualization).

Class 38 Telecommunications, streaming services. Music streaming platform operated at app.delicateaudio.com.

Class 41 Entertainment services, music and audio content delivery. Music streaming platform; album cover visualization services (Mosaix); community contributions and catalog (EXPEDIT).

Use by third parties of the mark "Delicate Audio" or substantially similar signs in any of these classes is prohibited without prior written authorisation from the trademark owner. This includes the use of confusingly similar names, logos, or domain names in the goods and services covered.

For licensing inquiries or trademark questions, contact via delicateaudio.com.
